

Urinal & WC Sanitiser

Technical Information

H 173mm

W 144mm

D 64mm

Sanokil: 1800 992 135

Sanokil Sanitiser Units clean, sanitise and deodorise. With each flush, a measured amount of scented fluid mingles with the water to penetrate deep inside the cistern fixtures and drain pipes to prevent the growth of bacteria and scale build-up.

Sanokil Sanitiser Units also stops the source of odours and drain clogging effectively. The formulation is biodegradable and pleasantly scented. Hazardous caustic or corrosive chemical drain openers that damage drain pipes are now history.

The Urinal and WC Sanitiser Units are perfect for installation in all toilets in office buildings, hotels, clubs, restaurants, schools, shopping malls and healthcare facilities.

- Environmentally friendly
- Clean, fresh smelling and clog free toilets
- Biodegradable treatment after each flush
- Pleasantly scented
- Regular service
